OEM 2D BARCODE READER YT-2000
Easy to pay, get payment quickly
High level drop resistance
One-button operation
This product is a 2D wired barcode scanner, a good helper of scanning barcodes and getting payment, which is widely used in O2O payment business, express logistics, supermarket, warehouses, etc.
It still works normally after falling from a height of 2 meters with the high drop resistance ABS shell.
USB communication keeps you away from the trouble of installing the driver.
It is compatible with multiple systems, like android, IOS and Windows system.
Automated scanning mode frees your hands.
Image-based scanner head, a new generation of decoding chips, can scan a wider range.
