

This laser barcode scanner combines omnidirectional and single-line laser scanning into a lightweight and ergonomic hand-held form factor. The scanner's automatic stand detection allows users to seamlessly switch from hand-held to presentation scanning. The 20-line scan pattern provides superior scanning over existing single-line scanners, making the Fusion laser scanner ideal for medium-volume retailers including specialty stores, pharmacies, liquor stores and convenience stores.

The scanner provides retailers with industry-leading omnidirectional scan performance and optional single-line scanning in a convenient size. provides retailers with industry-leading omnidirectional scan performance and optional single-line scanning in a convenient size.
